

## Meritor Parts

Meritor Parts - The Meritor Business is a premier global supplier established upon one hundred years of custom of service and quality. Meritor focuses on integrated systems with several modules and parts to the original machine manufacturers and aftermarket equipment within the transportation and industrial trades.

Meritor values the wishes of all their clients to guarantee their success while priding itself in the company's unique energy and thinks this output of energy to be their aggressive advantage in their international operations. Meritor begins with a culture that values diversity of people and their broad thought processes. Operating in 19 nations and hiring more than 11,200 individuals, Meritor encourages collaboration and innovation among a team of knowledgeable experts.

Meritor strongly believes in only hiring future focused individuals. These top-caliber individuals can quickly adapt to changing surroundings and freely demonstrate the level of commitment and performance required in order to obtain results for the competitive market environment. The business empowers their teams to make sound business decisions in order to enhance the overall success of the business. In return, Meritor offers all their employees different possibilities for professional and personal growth.

The Advanced Engineering team is on the forefront of components and system engineering. This consists of axles, drivelines, suspension and braking systems meant for heavy duty and medium trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is growing. They started a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives which represent the entire Asia Pacific region. This particular team is even responsible for supporting the needs of their international engineering workers.

The Quality team at Meritor is a customer-focused and dynamic group that is dedicated to ensuring optimum growth at their aftermarket distribution facilities and production plant that are located on 5 continents and in 19 countries.

They have their supplier network which is particularly located in order to support the development of the business. Each and every regional team has internationally supported quality systems, initiatives and centralized in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program encourages a data-driven, fact-based method to decision making in every part of the company. The DFSS or Design for Six Sigma ensures product reliability within every region. The team is also included transactional Green Belts who utilize Six Sigma tools to business techniques and implement lean methods.
