

## Barrel Clamp

Barrel Clamps - Referred to as "Barrel Clamp", this hydraulic accessory is utilized on lift trucks in order to clutch items which you wish to transfer using the forklift. Usually, they're used to handle kegs, paper rolls and barrels, with some barrel clamp designs being able to rotate the load. Like for instance, the rotate function enables the one operating the forklift to be able to insert a vertically stored paper inside the horizontal intake of a printing press.
