

## Aerial Work Platforms

Aerial Work Platforms - There are various lift truck accessories available on the market. They can help transform your forklift so that you could expand your ability to pick stuff up or finish clean up tasks and material handling with greater ease.

Several attachments were specifically designed for the forks themselves. For example, fork extensions can be utilized whenever you require a lot more blade length, that increases lifting capability. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are another type utilized whenever moving rolled material so as to make certain it does not roll off of the traditional flat forks.

Lifting accessories can be pivoting and telescoping crane attachments. They are available in various kinds. These attachments are usually utilized for transporting metal bars, poles, lumber or any sort of bulky things. Other accessories such as various kinds of hooks and hook plates are offered to be able to carry things making use of a chain or sling. Slab lifters and magnetic filters are other things that can be used with hook accessories. Slab lifters are specialized attachments that are meant for lifting a variety of materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your lift truck to make moving rolls of carpet easier. The accessory hooks onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are numerous other kinds of lift truck accessories which could be meant for facility maintenance like snow blades. These forks connect to front end loaders and can transport materials like for instance soil, snow and dirt. Other popular cleanup accessories include standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the lift truck blades hook onto for sweeping big spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal debris like on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up easy and fast.

A material spreader is one more lift truck accessory which is often used at facilities. These spreaders are helpful for various applications such as spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting attachment that numerous companies make use of everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location making use of the forklift. Larger platform models have extra space for workers to be able to carry tools and other necessary things meant for the job. Often work platforms are made of poly material or steel.
